Experience

Infra Support AG

Software Engineer

Lisboa, Portugal

2025 – Present

- Designed and built the Lavaresi Admin Panel end-to-end, an internal tool for property managers to manage a laundry reservation platform for residential buildings in Switzerland, taking the project from an early-stage prototype through to its current testing phase.
- Developed both the Flutter Web frontend and Python/Flask backend, following a layered DAO/service/controller architecture and reusing existing business logic from the main Lavaresi application, with PostgreSQL as the underlying database.
- Implemented a role-based permission system for superusers and property managers, together with core functionality for property, apartment, resident and laundry equipment management, a step-by-step building setup wizard, configurable usage restrictions, and one-off and recurring reservations.
- Developed operational features including bulk Excel data import, weekly and monthly occupancy metrics, reservation trends, configurable notifications, and multi-language support, covering the main administrative needs of the platform.
- Designed the initial UI in Penpot and worked mostly independently under weekly reviews with a senior developer, making decisions across UI/UX, architecture, data modelling and implementation, while progressively expanding the application with new features.

Viatel SA (Grupo Visabeira)

Administrative Manager

Lisboa, Portugal

2023 – 2025

- Built a Python desktop tool to automate the project-scheduling workflow, generating pre-filled request emails and logging every request to a CSV file, cutting a fully manual, repetitive process down to a short form.
- Managed scheduling, timing and location for around 10 daily public-road telecom projects across the Lisbon area, coordinating work crews and the police authorizations required for each intervention.
- Processed payments to the relevant authorities, ensuring permits and resources were in place within the required deadlines.

Education

Universidade de Lisboa

B.S. Physics, Minor in Computer Science

Lisboa, Portugal

Skills

Programming Languages: Dart, HTML/CSS, JavaScript, Python, SQL, $\LaTeX$

Software: Flask, Flutter, Git/GitHub, PostgreSQL, pytest, React, Penpot, Swagger, VS Code

Languages

- Portuguese (Native)
- Spanish (Native)
- English (Intermediate)
